Accessibility

These checks highlight opportunities to <u>improve the accessibility of</u> <u>your web app</u>. Only a subset of accessibility issues can be automatically detected so manual testing is also encouraged.

ditional items to manually check (11) — These items address areas which an automated testing tool cannot cover. arn more in our guide on conducting an accessibility review.	^
The page has a logical tab order	^
Tabbing through the page follows the visual layout. Users cannot focus elements that are offscreen. <u>Learn more</u> .	
Interactive controls are keyboard focusable	^
Custom interactive controls are keyboard focusable and display a focus indicator. <u>Learn more</u> .	
Interactive elements indicate their purpose and state	^
Interactive elements, such as links and buttons, should indicate their state and be distinguishable from non-interactive elements. <u>Learn more</u> .	
The user's focus is directed to new content added to the page	^
If new content, such as a dialog, is added to the page, the user's focus is directed to it. <u>Learn more</u> .	
User focus is not accidentally trapped in a region	^
A user can tab into and out of any control or region without accidentally trapping their focus. <u>Learn more.</u>	
Custom controls have associated labels	^
Custom interactive controls have associated labels, provided by aria-label or aria-labelledby. <u>Learn more</u> .	
Custom controls have ARIA roles	^
Custom interactive controls have appropriate ARIA roles. <u>Learn more</u> .	
Visual order on the page follows DOM order	^
DOM order matches the visual order, improving navigation for assistive technology. <u>Learn more</u> .	
Offscreen content is hidden from assistive technology	^
Offscreen content is hidden with display: none or aria-hidden=true. <u>Learn more</u> .	
Headings don't skip levels	^
Headings are used to create an outline for the page and heading levels are not skipped. <u>Learn more</u> .	
HTML5 landmark elements are used to improve navigation	^
Landmark elements (<main>, <nav>, etc.) are used to improve the keyboard navigation of the page for assistive</nav></main>	

technology. Learn more.

Pas	ssed audits (16)	^
•	[role]s have all required [aria-*] attributes	^
	Some ARIA roles have required attributes that describe the state of the element to screen readers. <u>Learn more</u> .	
•	Elements with an ARIA [role] that require children to contain a specific [role] have all required children.	^
	Some ARIA parent roles must contain specific child roles to perform their intended accessibility functions. <u>Learn more</u>	ţ.
•	[role]s are contained by their required parent element	^
	Some ARIA child roles must be contained by specific parent roles to properly perform their intended accessibility functions. <u>Learn more</u> .	
•	[role] values are valid	^
	ARIA roles must have valid values in order to perform their intended accessibility functions. <u>Learn more</u> .	
•	Buttons have an accessible name	^
	When a button doesn't have an accessible name, screen readers announce it as "button", making it unusable for users who rely on screen readers. <u>Learn more</u> .	,
•	The page contains a heading, skip link, or landmark region	^
	Adding ways to bypass repetitive content lets keyboard users navigate the page more efficiently. <u>Learn more</u> .	
•	Background and foreground colors have a sufficient contrast ratio	^
	Low-contrast text is difficult or impossible for many users to read. <u>Learn more</u> .	
•	Document has a <title> element</td><td>^</td></tr><tr><td></td><td>The title gives screen reader users an overview of the page, and search engine users rely on it heavily to determine if page is relevant to their search. <u>Learn more</u>.</td><td>а</td></tr><tr><td>•</td><td>[id] attributes on the page are unique</td><td>^</td></tr><tr><td></td><td>The value of an id attribute must be unique to prevent other instances from being overlooked by assistive technologies

If the page isn't actually in the default language, then the screen reader might not announce the page's text correctly. <u>Learn more</u>.</td><td>·r</td></tr><tr><td>•</td><td>httmlhttmlhttmlhttmlhttmlhttmlhttmlhtmlhttml<a href</td><td>^</td></tr><tr><td></td><td>Specifying a valid <u>BCP 47 language</u> helps screen readers announce text properly. <u>Learn more</u>.</td><td></td></tr><tr><td>•</td><td>Image elements have [alt] attributes</td><td>^</td></tr><tr><td></td><td>Informative elements should aim for short, descriptive alternate text. Decorative elements can be ignored with an empty alt attribute. <u>Learn more</u>.</td><td></td></tr><tr><td>•</td><td>Links have a discernible name</td><td>^</td></tr></tbody></table></title>	

	navigation experience for screen reader users. <u>Learn more</u> .	
•	Lists contain only elements and script supporting elements (<script> and <template>).</th><th>^</th></tr><tr><td></td><td>Screen readers have a specific way of announcing lists. Ensuring proper list structure aids screen reader output. <u>Learn more</u>.</td><td></td></tr><tr><td>•</td><td>List items () are contained within or parent elements</td><td>^</td></tr><tr><td></td><td>Screen readers require list items (`') to be contained within a parent `` or `` to be announced properly. <u>Learn more</u>.</td><td></td></tr><tr><td>•</td><td>[user-scalable="no"] is not used in the <meta name="viewport"> element and the [maximum-scale] attribute is not less than 5.</td><td>^</td></tr><tr><td></td><td>Disabling zooming is problematic for users with low vision who rely on screen magnification to properly see the contents of a web page. <u>Learn more</u>.</td><td></td></tr><tr><td>No</td><td>t applicable (19)</td><td>^</td></tr><tr><td></td><td>[accesskey] values are unique</td><td>^</td></tr><tr><td></td><td>Access keys let users quickly focus a part of the page. For proper navigation, each access key must be unique. <u>Learn more</u>.</td><td></td></tr><tr><td>•</td><td>[aria-*] attributes match their roles</td><td>^</td></tr><tr><td></td><td>Each ARIA `role` supports a specific subset of `aria-*` attributes. Mismatching these invalidates the `aria-*` attributes. <u>Learn more.</u></td><td></td></tr><tr><td>•</td><td>[aria-*] attributes have valid values</td><td>^</td></tr><tr><td></td><td>Assistive technologies, like screen readers, can't interpret ARIA attributes with invalid values. <u>Learn more</u>.</td><td></td></tr><tr><td>•</td><td>[aria-*] attributes are valid and not misspelled</td><td>^</td></tr><tr><td></td><td>Assistive technologies, like screen readers, can't interpret ARIA attributes with invalid names. <u>Learn more</u>.</td><td></td></tr><tr><td></td><td><audio> elements contain a <track> element with [kind="captions"]</td><td>^</td></tr><tr><td></td><td>Captions make audio elements usable for deaf or hearing-impaired users, providing critical information such as who is talking, what they're saying, and other non-speech information. <u>Learn more</u>.</td><td></td></tr><tr><td></td><td><dl>'s contain only properly-ordered <dt> and <dd> groups, <script> or <template> elements.</td><td>^</td></tr><tr><td></td><td>When definition lists are not properly marked up, screen readers may produce confusing or inaccurate output. <u>Learn more</u>.</td><td></td></tr><tr><td></td><td>Definition list items are wrapped in <dl> elements</td><td>^</td></tr><tr><td></td><td>Definition list items ('<dt>` and `<dd>`) must be wrapped in a parent `<dl>` element to ensure that screen readers can properly announce them. <u>Learn more</u>.</td><td></td></tr><tr><td></td><td><frame> or <iframe> elements have a title</td><td>^</td></tr><tr><td></td><td>Screen reader users rely on frame titles to describe the contents of frames. <u>Learn more</u>.</td><td></td></tr></tbody></table></script>	

Link text (and alternate text for images, when used as links) that is discernible, unique, and focusable improves the

	<input type="image"/> elements have [alt] text	^
	When an image is being used as an ` <input/> ` button, providing alternative text can help screen reader users understand the purpose of the button. <u>Learn more</u> .	d
	Form elements have associated labels	^
	Labels ensure that form controls are announced properly by assistive technologies, like screen readers. <u>Learn more</u> .	
	Presentational elements avoid using , <caption> or the [summary] attribute.</caption>	^
	A table being used for layout purposes should not include data elements, such as the thor caption elements or the summary attribute, because this can create a confusing experience for screen reader users. <u>Learn more</u> .	
	The document does not use <meta http-equiv="refresh"/>	^
	Users do not expect a page to refresh automatically, and doing so will move focus back to the top of the page. This may create a frustrating or confusing experience. <u>Learn more</u> .	
	<object> elements have [alt] text</object>	^
	Screen readers cannot translate non-text content. Adding alt text to ` <object>` elements helps screen readers convey meaning to users. <u>Learn more</u>.</object>	
	No element has a [tabindex] value greater than 0	^
	A value greater than 0 implies an explicit navigation ordering. Although technically valid, this often creates frustrating experiences for users who rely on assistive technologies. <u>Learn more</u> .	
	Cells in a element that use the [headers] attribute refer to table cells within the same table.	^
	Screen readers have features to make navigating tables easier. Ensuring `` cells using the `[headers]` attribute only refer to other cells in the same table may improve the experience for screen reader users. Learn more.	
•	elements and elements with [role="columnheader"/"rowheader"] have data cells they describe.	^
	Screen readers have features to make navigating tables easier. Ensuring table headers always refer to some set of cells may improve the experience for screen reader users. <u>Learn more</u> .	S
•	[lang] attributes have a valid value	^
	Specifying a valid <u>BCP 47 language</u> on elements helps ensure that text is pronounced correctly by a screen reader. <u>Learn more</u> .	
	<video> elements contain a <track/> element with [kind="captions"]</video>	^
	When a video provides a caption it is easier for deaf and hearing impaired users to access its information. <u>Learn more</u> .	
	<video> elements contain a <track/> element with [kind="description"]</video>	^
	Audio descriptions provide relevant information for videos that dialogue cannot, such as facial expressions and scenes. <u>Learn more</u> .	

Best Practices

Does not use HTTP/2 for all of its resources — 18 requests not served via HTTP/2 HTTP/2 offers many benefits over HTTP/1.1, including binary headers, multiplexing, and server push. Learn more. hreflang links tell search engines what version of a page they should list in search results for a given language or region. <u>Learn more</u>.

Document has a valid rel=canonical

Canonical links suggest which URL to show in search results. Learn more.

Document avoids plugins

Search engines can't index plugin content, and many devices restrict plugins or don't support them. Learn more.

Not applicable (2)

Document uses legible font sizes

Font sizes less than 12px are too small to be legible and require mobile visitors to "pinch to zoom" in order to read. Strive to have >60% of page text ≥12px. <u>Learn more</u>.

Tap targets are sized appropriately

Interactive elements like buttons and links should be large enough (48x48px), and have enough space around them, to be easy enough to tap without overlapping onto other elements. <u>Learn more</u>.

Progressive Web App

These checks validate the aspects of a Progressive Web App. <u>Learn</u> more.

- Fast and reliable
- Page load is fast enough on mobile networks

A fast page load over a cellular network ensures a good mobile user experience. Learn more

Current page does not respond with a 200 when offline

If you're building a Progressive Web App, consider using a service worker so that your app can work offline. Learn more.

start_url does not respond with a 200 when offline Timed out waiting for start_url to respond.

A service worker enables your web app to be reliable in unpredictable network conditions. Learn more.

+ Installable

Uses HTTPS

All sites should be protected with HTTPS, even ones that don't handle sensitive data. HTTPS prevents intruders from tampering with or passively listening in on the communications between your app and your users, and is a prerequisite for HTTP/2 and many new web platform APIs. <u>Learn more</u>.

A	Does not register a service worker that controls page and start_url	^
	The service worker is the technology that enables your app to use many Progressive Web App features, such as offline add to homescreen, and push notifications. <u>Learn more</u> .	e,
_	Web app manifest does not meet the installability requirements	^
	Failures: Manifest does not have a PNG icon of at least 192px.	
	Browsers can proactively prompt users to add your app to their homescreen, which can lead to higher engagement. <u>Learn more</u> .	
	PWA Optimized	
•	Redirects HTTP traffic to HTTPS	^
	If you've already set up HTTPS, make sure that you redirect all HTTP traffic to HTTPS in order to enable secure web features for all your users. <u>Learn more</u> .	
A	Is not configured for a custom splash screen Failures: Manifest does not have a PNG icon of at least 512px.	^
	A themed splash screen ensures a high-quality experience when users launch your app from their homescreens. <u>Lean more.</u>	<u>m</u>
•	Sets a theme color for the address bar.	^
	The browser address bar can be themed to match your site. <u>Learn more</u> .	
	Content is sized correctly for the viewport	^
	If the width of your app's content doesn't match the width of the viewport, your app might not be optimized for mobile screens. <u>Learn more</u> .	9
•	Has a <meta name="viewport"/> tag with width or initial-scale	^
	Add a ` <meta name="viewport"/> ` tag to optimize your app for mobile screens. <u>Learn more</u> .	
•	Contains some content when JavaScript is not available	^
	Your app should display some content when JavaScript is disabled, even if it's just a warning to the user that JavaScript is required to use the app. <u>Learn more</u> .	ot
•	Provides a valid apple-touch-icon	^
	For ideal appearance on iOS when users add a progressive web app to the home screen, define an `apple-touch-icon' It must point to a non-transparent 192px (or 180px) square PNG. <u>Learn More</u> .	
	ditional items to manually check (3) — These checks are required by the baseline <u>PWA Checklist</u> but are not comatically checked by Lighthouse. They do not affect your score but it's important that you verify them manually.	^
	Site works cross-browser	^
	To reach the most number of users, sites should work across every major browser. <u>Learn more</u> .	
	Page transitions don't feel like they block on the network	^
	Transitions should feel snappy as you tap around, even on a slow network. This experience is key to a user's perception of performance. <u>Learn more</u> .	n

Each page has a URL

Ensure individual pages are deep linkable via URL and that URLs are unique for the purpose of shareability on social media. <u>Learn more</u>.
